

# 5 WAYS TO INCREASE YIELD WITHOUT INCREASING COST

- 1.** Selecting the right seed for each field is key to guaranteeing success

- 2.** Proper seed bed preparation helps control moisture

- 3.** For planting soybeans, ensure your soil is at least 54° F, and for planting corn, ensure your soil is at least 50° F

- 4.** Ensure your seed is planted at the right depth

- 5** Make sure your equipment is maintained properly to ensure even seed spacing when planting
